# GX4® GAS MONITOR

## THE ULTIMATE MULTI-GAS DETECTOR

Dangerous levels of toxic gases can cause severe injury or death. The RPB® GX4® Gas Monitor gives you the complete confidence that the air you and your employees breathe is safe.

Gases such as carbon monoxide are invisible to all the human senses, yet are commonly found in industrial premises worldwide. While low-level exposure may not be immediately fatal, ongoing contact at low levels has a cumulative effect, causing serious illness and long-term health concerns. Early symptoms can be mistaken for the flu, headaches or tiredness. It is a serious problem which is commonly overlooked.

The GX4® can detect up to four gases simultaneously. It includes smart device and cloud integration capabilities enabling you to view your air quality from any device, while sensors are displayed online in real time.

### APPLICATIONS INCLUDE

- Spray painting, coating and confined space applications
- Pharmaceutical manufacturing
- Chemical, pesticide and materials handling
- Chemical stripping
- Waste management

Connect to the GX4® from your laptop, tablet, phone or even network to view real time data, download logs, alter alarm points and much more.

### GAS SENSORS

A range of pre-calibrated gas sensors are available including CO, O<sub>2</sub> and H<sub>2</sub>S. All have a 2 year shelf life.
